Taipei solar container communication station Energy Storage Construction Project

**FLEXIBLE SETTING OF
MULTIPLE WORKING MODES**

Overview

What is the future of energy storage in Taiwan?

Therefore, Taiwan will focus on developing FTM storage, followed by BTM-C&I. InfoLink projects that FTM storage will make up 90% of the energy storage deployment in Taiwan, with solar-plus-storage applications reaching 50%. In terms of economic scale, energy storage market is expected to surpass NTD 10 billion by 2023 and NTD 20 billion by 2026.

Will Taiwan's energy storage system play a role in grid stability?

TECO Chairman Sophia Chiu pointed out that in the future when a large amount of offshore wind power is added to Taiwan's power system, energy storage systems will play an important role in grid stability.

Can Taiwan High Speed Rail install solar photovoltaic system?

In 2019, Taiwan High Speed Rail continued its practice of leasing its own station roof to a contractor for installing solar photovoltaic system through a bidding process. Currently, this is the only project that involves setting up and operating the solar photovoltaic system on the station roof of Taiwan High Speed Rail through leasing.

What is roof-based solar photovoltaic power generation system in Taiwan?

Installed on the roofs of the station hall and the covered corridor that is used by passengers to enter and exit the station square, the scale of this solar photovoltaic power generation system is the largest among the operating transportation stations that have roof-based solar photovoltaic facility in Taiwan.
