

EQACC SOLAR

Tajikistan portable mobile power processing

Overview

Why does Tajikistan need interconnecting power systems?

In the case of Tajikistan, it provides a bigger market to which it can sell its hydropower surpluses. In energy security terms, interconnecting power systems offers a more diverse energy supply and reduces the impact of disruptions.

Does Tajikistan have a power system?

The existing electrical transmission and distribution systems of Tajikistan, designed in the 1970s during the Soviet era, are also being upgraded and expanded, allowing transmission of power from Tajikistan to surrounding countries.

Should Tajikistan increase its institutional readiness for more integrated electricity markets?

Tajikistan should increase its institutional readiness for more integrated electricity markets. Effective cross-border trade depends on a reliable power sector at the domestic level.

Can Tajikistan become a net energy exporter?

The Government of Tajikistan aims to transform itself from a net energy importer to a net energy exporter, on the strength of its potential for hydropower and solar power production. According to the World Bank, Tajikistan's power production is 92 percent hydropower, six percent hydrocarbon, and two percent from other sources.

Tajikistan portable mobile power processing

Tajikistan's Energy Paradox

Tajikistan's power sector is heavily dependent on hydropower, which accounts for over 90% of electricity production. While this results in ...
