

# Thailand New Energy makes battery cabinets

## Overview

---

Does Thailand need a battery energy storage system?

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see the country struggle to fulfil carbon neutrality and Net Zero commitments over the coming decades.

Could a sodium-ion battery be a new business opportunity in Thailand?

The Federation of Thai Industries' Renewable Energy Industry Club sees potential in sodium-ion battery (SIB) production as an alternative to lithium-ion batteries. SIBs, made from rock salt, could offer a new business opportunity given Thailand's abundant rock salt reserves.

Who makes battery energy storage system enclosures?

Jabil Inc. (NYSE: JBL), a global engineering, supply chain, and manufacturing solutions provider, today announced it has expanded its collaboration with Inno, a metal parts manufacturer and a subsidiary of Shanghai Xinpeng Industry Co. (XP), to manufacture battery energy storage system (BESS) enclosures.

Why is battery storage a problem in Thailand?

This is partly due to a lack of clarity on how battery storage fits into existing electricity infrastructure. In 2022, the Thai government approved 24 BESS projects, all of which were located alongside solar operations. Their total combined storage capacity was 994 MW.
