# The best solar panels

## Overview

---

What are the best solar panels for homes?

Best Solar Panels for Homes — Solaria The Solaria brand is now a part of Maxeon Solar Technologies! Not all solar panels are created equal. Your home deserves a solar system that looks good. A solar system that delivers maximum energy in all conditions, even when partially shaded. A solar system that just works, year in and year out.

Who makes the best solar panels?

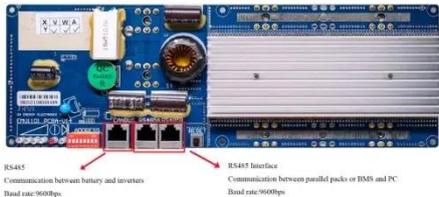

After all of that, Sunpower stood out above the rest. They manufacture their panels, which are rated as the most efficient available, and they keep their local warehouse stocked! Certified Tesla installers as well. I had the pleasure of working with Michael French.

Which solar panels are most efficient?

Monocrystalline solar panels are the most efficient, with an efficiency rate of around 20-22%. They are made from single-crystal silicon, which allows them to convert a higher percentage of sunlight into electricity. Polycrystalline solar panels are slightly less efficient, with an efficiency rate of around 15-17%.
