# **The hardest solar glass**

## Overview

---

Researchers led by Academician Tian Yongjun from Yanshan University have developed a revolutionary new glass material, named AM-III, that is not just the hardest but also the strongest glass ever created. What is the World's Strongest glass?

Researchers from China developed the world's strongest glass. AM-III, a glass so hard that it can easily scratch diamond crystals. Read to know all about its development and applications.

What is the toughest glass?

Corning's Gorilla Glass Victus is its toughest material, with a fracture toughness of 0.76 megapascals (MPa). The glass produced in the Bayreuth study – published in this month's Nature Materials journal – has a strength of 1.99 MPa.

Could ultra-hard glass make solar panels sturdier?

Aside from being an impressive engineering feat on its own, the ultra-hard glass has the right properties to make sturdier solar panels and other semiconductors, The Independent notes — potentially adding a new tool in the push to clean up our energy infrastructure.

Could a yellow-tinted glass make bulletproof windows tougher?

It could create bulletproof windows that's 20 to 100 times tougher than current versions. A team of researchers in northern China developed the world's hardest glassy material, the transparent, yellow-tinted AM-III, which is capable of leaving a deep scratch on the surface of a diamond, a report from South China Morning Post explains.

## The hardest solar glass

---

### Scientists Create Glass That's as Strong as a Diamond

A new glass called AM-III is so hard it can scratch the surface of diamonds and could be used in new ultra-sturdy solar panels.

---

### The hardest glass comes out? -Hongjia Glass

A paper published in the National Science Review (NSR) in early August introduced a new type of glass born in the laboratory: AM-III, ...

### Is aluminosilicate glass the "strongest glass ...

Aluminosilicate glass mixes standard oxide glass with silicon, aluminum, boron, and oxygen (aluminosilicate). Chemically, the main ...

---

### Solar Glass in Solar Panel: All You Need to ...

Know about solar glass in solar panels.  
Discover how it works, types of solar panel, importance and impact of low-quality glass on solar panel ...

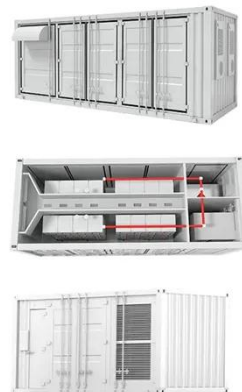

### Scientists Develop New "Unbreakable Glass" Inspired by ...

Shiny nacre of Abalone washed ashore. Strongest and toughest glass known developed by McGill University scientists. Scientists from McGill University develop stronger ...

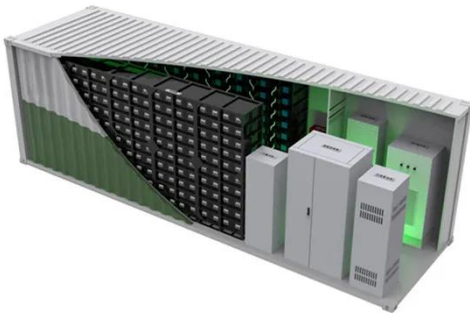

### Shattering Expectations: Chinese Scientists Create Glass ...

Chinese scientists have created AM-III, a novel glass material that is harder and tougher than diamond. AM-III's uniform hardness and resistance to fracture, coupled with its ...

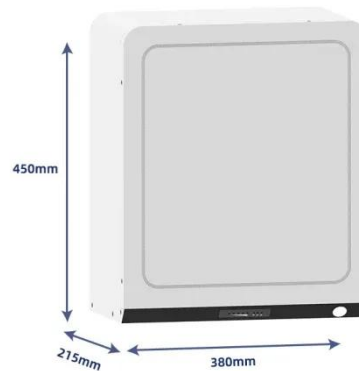

### Solar Glass

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets ...

## Scientists Just Created a New "Glass" That's Tougher Than ...

In 2013, Tian and his team created the world's hardest material that's visible to the naked eye, a boron nitride crystal that is twice as hard as diamond at 200 GPa.

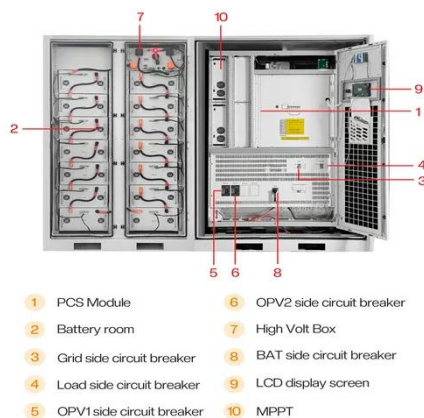

## 'World's strongest glass'

Everything special about the 'world's hardest glass' According to the researchers the glass has outstanding electronic and mechanical ...

## Scientists Develop New "Unbreakable Glass" ...

Shiny nacre of Abalone washed ashore. Strongest and toughest glass known developed by McGill University scientists. ...

## Glass made for the sun

AGC offers extra clear float glass products for a broad range of solar applications. Your single source: High-efficient float glass production, ...

## Xinyi Solar Holdings Limited

Xinyi Solar Holdings Limited Anti-Reflective Coating Solar Glass Using internationally leading technology and equipment, an antireflection ...

## World's strongest glass that's as hard as diamond discovered

Chinese scientists develop world's strongest glass that's as hard as diamond Material could find applications in solar cells due to its 'outstanding'

mechanical and electronic ...

### **The hardest glass comes out? -Hongjia Glass**

A paper published in the National Science Review (NSR) in early August introduced a new type of glass born in the laboratory: AM-III, which is the hardest glass ...

### **Scientists Create Glass That's as Strong as a ...**

A new glass called AM-III is so hard it can scratch the surface of diamonds and could be used in new ultra-sturdy solar panels.

### **Scientists Just Created a New "Glass" That's ...**

In 2013, Tian and his team created the world's hardest material that's visible to the naked eye, a boron nitride crystal that is twice ...

### **What materials are most difficult to recover ...**

The most difficult materials to recover from solar panels are typically the internal components embedded within tightly bonded layers ...

### **Is aluminosilicate glass the "strongest glass ever?"**

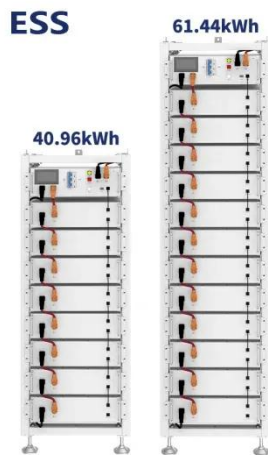

Aluminosilicate glass mixes standard oxide glass with silicon, aluminum, boron, and oxygen (aluminosilicate). Chemically, the main difference is the substitution of boron for ...

### **What Materials Scratch Glass?**

Atlantic Custom Glass answers what materials scratch glass. Protect your windows and glass surfaces with ...

## World's Strongest Glass That's As Hard As Diamond ...

Hmmmmmm shares a report from The Independent: Scientists in China have developed the hardest and strongest glassy material known so far that can scratch diamond ...

## World's strongest glass that's as hard as ...

Chinese scientists develop world's strongest glass that's as hard as diamond Material could find applications in solar cells due to its ...

## World's strongest glass can scratch the surface of a diamond

The team's comprehensive mechanical testing proved AM-III to be the hardest and strongest amorphous material known so far, and capable of scratching

the surface of a diamond.

### **New ultrahard diamond glass synthesized , ScienceDaily**

An international research team that synthesized a new ultrahard form of carbon glass with a wealth of potential practical applications for devices and electronics. It is the ...

### **'World's strongest glass'**

Everything special about the 'world's hardest glass' According to the researchers the glass has outstanding electronic and mechanical properties. In addition to this, its ultra ...
