

EQACC SOLAR

The largest energy storage project in Milan Italy

Overview

What is the largest grid-connected storage system in Europe?

In particular, the Blackhillock project in Scotland, with 300 MW/600 MWh, is today the largest grid-connected storage system in Europe and capable of guaranteeing grid stability exclusively through batteries. Sma took care of the engineering, plant control integration and grid studies to prove its effectiveness.

Why should we invest in Italy's digitised energy infrastructures?

The company's commitment translates into both proprietary solutions and adaptation - already today - to the most stringent EU requirements for digitised energy infrastructures. The Italian storage market also represents a key test bed for large-scale integration of renewables and smart grid management.

Will Italy become Europe's most significant battery storage market?

A GCSS spokesperson noted that Italy's strong fundamentals and supportive policy environment position it to emerge as one of Europe's most significant battery storage markets, with the carefully curated projects tactically located to benefit from both northern and southern market opportunities.

How many MW of solar PV are there in Italy?

With over 100 MW of operational solar PV assets across 14 Italian regions, the company has recently completed the acquisition of a major national portfolio of electrochemical storage projects at various stages of maturity and spread throughout the country.
