

# The role of container substation in Sukhvo Albania

## Overview

---

What is container type unitized compact substation?

Container type unitized compact substation Container type unitized CSS compact substation is a complete type tested per latest IEC standard 62271-202 which is comprising a outdoor enclosure containing medium voltage (MV) switchgear, power or distribution transformers, low voltage (LV) switchboards.

What is a container substation?

An intelligent solution for obtaining direct current quickly and economically is provided by container substations. By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a consistent and high level of quality.

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas with high pollution, high humidity, extreme temperatures or sand storms. Containers are easy to transport and fast to install, by reducing foundation works as well as installation and commissioning effort on site.

Why should you choose Siemens traction power substations?

By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a consistent and high level of quality. The state-of-the art equipment and connectivity allows optimal operations and transparency.
