

## EQACC SOLAR

# The school uses a 500kWh North African folding container

## Overview

---

How much power does a school need in Africa?

We find that the aggregated total capacity required to power all schools lacking electricity in Africa is of 0.8 GW p with 0.1 GWh of battery storage (Tables S1 and S2), as determined by applying the baseline option.

Do African schools have basic infrastructure?

Although most people born this century will be educated in African schools, these schools often lack basic infrastructure, such as electricity and/or lighting.

How many people live near a school without electricity in Africa?

Across Africa, over 37% of primary and secondary school-age population live closest to a school without electricity. Furthermore, 25% and 53% of students live over an hour away from their nearest electrified school when traveling, respectively, by motorized transport or by foot.

How many studies have been published on electrification of schools in Africa?

A bibliometric assessment assisted by a large language model (LLM) identified only a limited number of publications on the electrification of schools in Africa between 1990 and 2024 10,11,12,13,14,15,16,17,18,19,20,21,22,23,24,25,26, 27,28,29,30,31,32,33,34,35,36 (see methods).
