**There are several battery cabinet factories in London**

## Overview

---

Is the UK a good place to build a battery?

The battery sector is one of the highest growth clean energy sectors [footnote 134] and the UK is well placed to reap the rewards thanks to its comparative advantage in research and automotive manufacturing. The government is committed to making the UK one of the best places in the world to build and invest.

Who are the leading battery manufacturers in the UK?

In the UK, key battery manufacturers include AESC, CATL, Hyperbat, and Volklec, which are pivotal players producing a variety of batteries for electric vehicles (EVs) and energy storage solutions. Understanding these manufacturers and their contributions is essential for grasping the dynamics of the UK's growing battery market.

Will the UK be a world leader in sustainable battery design & manufacture?

The UK will be a world leader in sustainable battery design and manufacture, underpinned by a thriving battery innovation ecosystem. Batteries represent one of the highest growth clean energy sectors [footnote 1] and the UK is well placed to reap the rewards thanks to its comparative advantage in research and advanced manufacturing.

Could the UK re-skill the battery industry?

The UK has expertise and a large labour pool (2.6 million in manufacturing as a whole) [footnote 132] that could re-skill and up-skill in battery technologies, including in their safety.

### UK battery strategy (HTML version)

Foreword from the minister  
Executive summary  
Part 1: context  
Part 2: the UK's approach  
Part 3: delivering the strategy and measuring our success  
Annex I: glossary and acronyms  
Annex II: call for evidence responses  
Annex III: demand modelling  
Nusrat Ghani MP, Minister of State for Industry and Economic Security at the Department for Business and Trade  
Batteries will play an essential role in our energy transition and our ability to successfully achieve net zero by 2050. High capacity and reliable rechargeable batteries are a critical component of many devices, modes of transport, and our evolving energy generation capability. Today we publish the UK's first battery strategy, alongside the Advanced Manufacturing Plan. The government's 2030 vision is for the UK to have a globally competitive battery supply chain that supports economic prosperity and the net zero transition. The UK will be a world leader in sustainable battery design and manufacture, underpinned by a thriving battery innovation ecosystem.
