Tiraspol Communications 5G base station construction and planning

Overview

What is the application effect of a 5G base station?

The actual application results show that the application effect of this method in 5G network can reach 29%, which is in the same industry leading position . The selection of base stations should comprehensively consider various indicators, such as sharing rate, planning accuracy rate, and planning depth.

Can a multi-objective 5G base station planning model be used in real life?

Finally, the simulation experiment results are analyzed and it is concluded that the multi-objective 5G base station planning model combined with genetic algorithm has high coverage and feasibility in real life, and then provides a new direction for base station location selection.

What are the specific solutions for a base station?

The specific solutions are as follows: (1) objective function: the base station needs to maximize the needs of the business volume, the base station must have a high standard after planning, and the cost of establishing the base station should be the lowest.

Tiraspol Communications 5G base station construction and planning

Modeling 5G shared base station planning problem using an ...

With the cost of 5G network construction surges, Base Station (BS) sharing is becoming more and more popular among operators nowadays. A typical scenario of 5G ...
