

**EQACC SOLAR**

# **Township container generator installation station**

## Overview

---

**Anti-vibration frame design:** The load-bearing components such as the generator container column, top and side plates are rigidly connected, and the frame is fully welded, which fully meets the mecha.

**What are containerized generator / packaged container and enclosure options?**

Containerized generator / Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets, balance of plant equipment, and switchgear.

**What is a containerised generator?**

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

**What is a Tier 4 containerized generator?**

Our Tier 4 containerized generators are high-powered —500 kW to 1250 kW— units packaged in 30-foot or 48-foot ISO containers.

**What is a twin power container?**

The Twin Power container solution is a container that combines two engine/alternator assemblies with/ without CHP in a 40ft container, making it perfect for applications that require variable or continuous power. Because you have two generators on a single platform, you have the flexibility you need to meet a 100% load or even a smaller load.
