# **Tunisian companies exporting energy storage products**

## Overview

---

Can Tunisia export green electricity?

Exploiting its renewable energy potential will also allow Tunisia to export green electricity, including green hydrogen, contributing to the GHG emission targets of the Maghreb and Europe.

How will the transition of the energy sector impact Tunisia?

The planned transition of the energy sector would also lead to more economic opportunities and private sector-led job creation. The Government of Tunisia (GoT) has embarked on an ambitious path to increase its renewable energy production.

What is a virtuous cycle of energy production in Tunisia?

A virtuous cycle of green, affordable, and financially viable energy production. I. The Tunisian Energy Landscape Tunisia relies on imported natural gas to meet the majority of its growing electricity needs, even though the country has a vast potential to generate renewable energy.

Does Tunisia need oil and gas?

Once a net exporter of oil and gas, Tunisia has become heavily dependent on oil and gas imports to meet its energy needs, with approximately 48% of its needs imported in 2022. Natural gas is the principal fuel employed to generate electricity.
