# Tuvalu energy storage exports

## Overview

---

What is Tuvalu's energy supply?

In 2021, fossil fuels accounted for 96 percent of Tuvalu's total energy supply, while solar and other renewable energy sources accounted for 4 percent. Tuvalu's economy is therefore highly vulnerable to fuel prices' volatility, which is why it is critical to find alternative sources of energy for the country's electricity supply.

Why does Tuvalu need a solar project?

This solar project echoed Tuvalu's action during COP15 and sent a symbolic message about the importance and necessity of global and concerted actions worldwide to promote renewable energy and mitigate climate change impacts to save threatened countries. However, the majority of Tuvalu's energy sources are imported fossil fuels.
