

**EQACC SOLAR**

**Two solar lights for home use**

## Overview

---

Are solar lights a good option for outdoor space?

One great way to illuminate your outdoor space is with solar lights. Sarah Jameson, marketing director of Green Building Elements, says, "Solar lights, compared to low voltage and line voltage outdoor lights, are safer and more DIY-friendly since there's little to no wiring required at all."

Can solar lights be used under a porch?

Some solar lights have small panels on each individual light, while others have a single external panel that powers the entire set. You might prefer the latter if you want to use the lights under a porch or covered patio; you'll be able to give the solar panel direct sunlight while keeping the lights where you want them.

Do outdoor solar lights work?

Outdoor solar lights work best when they have access to direct sunlight to charge for multiple hours during the day, which is how the manufacturers calculate battery life and runtime. They will work on cloudy days or in areas with indirect light, but you might notice that they aren't quite as bright or long-lasting.

What are the best solar lights?

We chose the AloftSun Solar Motion Sensor Outdoor Lights as the overall best solar lights for their durability, water resistance, and motion-sensing capabilities. If you're looking for a set of string lights, we loved the Brightech Ambience Pro Solar Powered Outdoor String Lights, because they held up to water and freezing temperatures.
