UK Energy Storage Industrial Park Construction Project

Overview

What is the Uskmouth battery storage project?

The Uskmouth battery storage project represents a major anchoring project in the planned re-development and regeneration of the Uskmouth site into a Sustainable Energy Park that will support innovative future industry. About Quinbrook.

Could a new battery storage facility be built at Uskmouth Power Station?

More info Plans to create one of the largest battery storage facilities in the UK at the site of the former coal powered Uskmouth Power Station in Newport have been boosted with a £8.5m loan from the Cardiff Capital Region.

How many battery storage projects are there?

The pipeline of battery storage projects has continued to grow steadily again, from 84.4GW in December 2023 to 95.5GW in May 2024. This edition of the EnergyPulse report on Energy Storage shows there is 8.7GW of batteries in operation and under construction and more than 30GW projects have now been consented.

What infrastructure is used to build a coal-fired power station?

The site was formerly a coal-fired power station, and the project uses existing infrastructure such as the grid connection, industrial water supplies and railway access to deliver materials, battery and PCS containers directly to the site.
