# **UPS uninterruptible power supply cutover**

**18650** 3.7V  
Li-ion  
RECHARGEABLE BATTERY

**2000mAh**

## Overview

---

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is a backup power system that ensures devices and equipment continue functioning during power interruptions. When the main power source (usually the electric grid) experiences a failure, the UPS immediately switches to its backup power, allowing systems to continue operating without disruption.

How do I choose a reliable uninterruptible power supply (UPS) system?

When it comes to selecting a reliable Uninterruptible Power Supply (UPS) system, it's important to choose a trusted supplier. Unikeyic Electronics offers a wide range of high-quality UPS systems that cater to various industries, ensuring that your critical equipment is always protected.

What does a ups do if a power supply fails?

The system remains in standby mode, monitoring the main power supply. When it detects a power failure, the UPS switches to backup power from the battery within milliseconds. Best For: Low-power applications, such as home computers, gaming systems, small office equipment, and personal devices.

What happens if a ups fails?

One of the most critical uninterruptible power supply questions and answers is what happens when a UPS fails. In the event of a failure, connected devices may lose power immediately unless a secondary backup system is in place.
