UPS uninterruptible power supply equipment installation includes battery cabinet installation

Overview

What is an uninterruptible power system (UPS)?

Uninterruptible power system (UPS) (1) An electrical system designed to provide instant, transient- free backup power during power failure or fault. Some UPSs also filter and/or regulate utility power (line conditioning). (2) A Device whose sole purpose is to save your equipment, your data and your job. User replaceable.

What is an ups & how does it work?

A UPS (uninterruptible power supply) system is an essential piece of equipment for any business or organization that relies on computer systems and other electronic equipment to function. It provides backup power in the event of a power outage, ensuring that your equipment stays up and running and protecting against data loss and other damage.
