

**EQACC SOLAR**

# **US Vanadium Battery Energy Storage Project**

## Overview

---

Is vanadium the future of battery energy storage?

The use of vanadium in the battery energy storage sector is expected to experience disruptive growth this decade on the back of unprecedented vanadium redox flow battery (VRFB) deployments.

What is a vanadium flow battery system?

Vanadium flow battery systems are ideally suited to stabilize isolated microgrids, integrating solar and wind power in a safe, reliable, low-maintenance, and environmentally friendly manner. VRB Energy grid-scale energy storage systems allow for flexible, long-duration energy storage with proven high performance.

Can vanadium redox flow battery storage improve grid management?

Sumitomo and SDG&E's 2MW/8MWh redox flow battery system. Credit Sumitomo Utility San Diego Gas and Electric (SDG&E) and Sumitomo Electric (SEI) have launched a 2MW/8MWh pilot vanadium redox flow battery storage project in California to study how the technology can reliably integrate renewable energy and improve flexibility in grid management.

Who is providing a vanadium flow battery for Pacific Northwest National Laboratory?

Supported by \$10m funding from the U.S. Department of Energy, Invinity Energy Systems is delighted to be providing the vanadium flow battery for Pacific Northwest National Laboratory's 24 hour energy resiliency project.  
Wednesday 29 November 2023

## US Vanadium Battery Energy Storage Project

---

### **SDG& E and Sumitomo unveil largest vanadium redox flow battery in the US**

The redox flow battery system developed for the project is the largest of its kind in the US, claims SEI. Over a four-year period, SDG& E will be testing voltage frequency, power ...
