Uninterruptible Power Supply Design New Zealand

Overview

How do uninterruptible power supplies work?

For more information, check out our complete guide to uninterruptible power supplies. An online UPS system supplies power by converting incoming AC power to DC and then reconverts it to a stable AC output through an inverter, all while continuously charging the batteries.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS), is an easy-to-install device designed to provide backup power to computers, servers, server rooms and data centres in the event of a main energy failure, electrical surge or unexpected power cut.

What are Allen-Bradley uninterruptible power supplies (UPS)?

The Allen-Bradley range of Uninterruptible Power Supplies (UPS's) are ideal for use in Industrial processes and are available in both a standard rugged design and a networking model option with remote control and battery expandable features.

Who makes UPS & backup batteries in New Zealand?

A full range of UPS and backup battery solutions, ensuring uninterrupted power for critical operations across New Zealand. We maintain stock locally, and install nation wide, offering fast access to essential equipment. Our solutions include trusted brands such as Schneider/APC, Delta, Eaton, ABB, Liebert/Vertiv, Riello, and Emerson.
