# **Uninterruptible Power Supply for Cambodia Manufacturing Industry**

## Overview

---

What is a Mitsubishi Electric uninterruptible power supply (UPS) system?

Mitsubishi Electric uninterruptible power supply (UPS) systems provide daily power conditioning as well as backup power in the event of an outage to reduce damage to manufacturing equipment and maintain uptime for your production line.

How will Cambodia become an integrated electronics production hub?

The Kingdom will first focus on expanding output in simple components and sub-assembly, including cables and connectors, and printed circuit board (PCB) assembly, before moving up the value chain in the mid-term and turning Cambodia into an integrated electronics production hub, including final assembly, in the long run.

Why do you need an uninterruptible power supply system?

Uninterruptible power supply systems can reduce downtime (and its cost) in manufacturing by providing reliable backup power in an emergency. A UPS allows your systems to shut down slowly, in alignment with standard procedures, as opposed to the rapid shutoff of an outage, which could damage the equipment.

What are the main sources of electricity in Cambodia?

Major sources of local power generation are hydro and coal, and minor sources include diesel, wood, and biomass. In addition to local power generation, Cambodia also buys electricity from neighboring countries, especially during the dry season.

## Uninterruptible Power Supply for Cambodia Manufacturing Industry

### UPS (Uninterruptible Power Supply) @ TK Computer KH, Cambodia

All types of UPS (Uninterruptible Power Supply) are available at TK Computer Kh @ Phnom Penh Cambodia. All UPS (Uninterruptible Power Supply) are available for both retail and wholesale.
