

EQACC SOLAR

Uninterruptible power supply for Austrian substation

Overview

What is a static uninterruptible power supply (UPS)?

Our static uninterruptible power supply (UPS) systems comply with the VFI-SS-11 classification according to IEC 62040-3. With their robust industrial design, they support a secure consumer supply in continuous operation.

What is an uninterruptible combined UPS system?

The uninterruptible combined UPS units include an economical 24 V DC switched mode power supply with an integrated charge and control unit for optimal battery management. These space-saving combined UPS systems control and monitor the connected battery modules, providing early warnings when battery life expectancy is low.

What is a Gustav Klein UPS system?

Gustav Klein UPS systems are equipped with a colour touch screen display and consist of the components: Supports consumption-optimized networks (input THDi $\leq 6\%$, hardly any reactive power consumption, battery test by means of mains regeneration and full UPS power).

Does ABB offer a standalone or modular UPS?

For every application and every context, ABB has a standalone or modular UPS. From the world's largest data centers to office server rooms, ABB solutions lead the field in UPS innovation. Speak to our experts for customer-focused critical power solutions that deliver more – space, savings and scalability.

Uninterruptible power supply for Austrian substation

Power & Utilities

POWER AND UTILITIES Our UPS systems are integrated in all kinds of power generation plants, including cogeneration, combined cycle, nuclear, hydro, thermal, wind and thermosolar. We ...
