Uninterruptible power supply for building installation

Overview

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) provides a source of power for the equipment it protects. If there is a disruption to power, the UPS has an on-board battery to automatically supply to electrical equipment until the disruption is over or back-up generators kick-in. What is a WIMES UPS?

.

What is a water power supply (UPS)?

WIMES (Water Industry Mechanical and Electrical Specifications) UPS (uninterruptible power supply) is a robust critical power system built for harsh atmospheres such a dusty environments, moisture and humidity, as well as extremes in temperature and sites where robust solutions are required.

Can a containerised ups be installed on a roof?

Yes, a containerised UPS (uninterruptible power supply) system can be installed on a roof, car park or where space is limited. Can I buy a replacement UPS battery?

Replacement batteries can be purchased for UPS. Replacing the batteries every 3-5 years can extend the lifespan of your UPS. We can advise you on the best battery for your product.

What is a UPS system?

A UPS system is a mode of stand-by power, that provides power to a load in the event of a mains power failure or in the event of voltage irregularities. There are three main types of UPS systems. Offline/Standby: This UPS is the most basic system and provides surge protection and battery backup.
