How to install ups?

Installation Procedure UPS systems are to be installed as per the approved drawings, as per the new approved single-line diagram for UPS attached in the material submittal. The installation will begin by placing the UPS units in the pre-determined location. The input and output cables for each UPS will be connected.

How to increase power in a modular UPS system?

It is easy to achieve redundancy or increase power in modular systems simply by adding one or more modules, and without having to connect multiple UPS in parallel . Furthermore, any faults in the power circuits in modular UPSs remain confined to one single module which is automatically excluded .

How do I dimension an ups?

You will need to know the following basic parameters to dimension a UPS correctly:

- APPARENT power: this is the maximum output power available from the UPS expressed in VA .
- ACTIVE power: this is the maximum output power available from the UPS expressed in W .
- Power factor (PF) this is the ratio between active and apparent power (W/VA) .
