

# Uninterruptible power supply planning for base station rooms in Papua New Guinea

SUPPORT REAL-TIME ONLINE  
MONITORING OF SYSTEM STATUS

## Overview

---

Why should PNG Power Limited implement system planning & maintenance?

The purpose of this project is to ensure PNG Power Limited can properly implement system planning for the transmission line, and the maintenance for the transmission line and substations by enhancing their capacity to know-how and be able undertake system planning and maintenance on its own. 2.

Why is electricity access important in PNG?

1. Introduction & Background Electricity access is the key to the socio-economic growth of the country. However, currently only 13% of its population has reliable access to electricity in PNG. The Government of PNG is trying to achieve that 70% of households get electricity access in accordance with PNG Development Strategic Plan 2030.

What is the project purpose of PNG Power Limited (PPL)?

The project purpose is that PNG Power Limited (PPL) can properly implement system planning for the transmission line, and maintenance for transmission line and substations on its own. The specific indicators as below mentioned 1. Revised system investment planning is proposed by PPL based on simulation and financial and economic analysis. 2.

What is Papua New Guinea electrification partnership (Pep)?

To address this development challenge, Papua New Guinea, Australia, Japan, New Zealand and the United States joined together and signed to Papua New Guinea Electrification Partnership (PEP) joint statement in late 2018 in support of Papua New Guinea's objectives for electrification.
