Uzbekistan household energy storage power supply

Overview

Does Uzbekistan need energy storage?

By 2030, Uzbekistan aims to source over 40% of its electricity from renewables, demonstrating its commitment to sustainability. The plan also includes advancing energy storage, with a 300 MW lithium-ion system debuting in 2024 and a goal of 4.2 GW storage capacity by 2030. The Role of Energy Storage in Renewable Energy.

How is Uzbekistan transforming its energy sector?

Uzbekistan is rapidly transforming its energy sector with a focus on renewable energy to reduce reliance on fossil fuels. Since 2021, the country has added 10 new renewable plants, including nine solar and one wind facility, with a total capacity exceeding 2,500 MW, alongside over 2,200 MW from hydroelectric plants.

How will Uzbekistan support supplementary power?

A crucial aspect of this plan is ensuring that regions facing energy deficits can receive supplementary power from other areas. The government plans to invest \$4 billion in the National Electric Grid of Uzbekistan over the next five years to facilitate these projects.

How much electricity does Uzbekistan need?

According to projections, Uzbekistan will require 117 billion kilowatt-hours of electricity by 2030, increasing to 135 billion kilowatt-hours by 2035—1.7 times the current consumption. To meet these demands, the Ministry of Energy has developed a long-term strategy focused on infrastructure development and efficiency improvements.
