Victoria Portable Power Storage Enterprise

Overview

What is the first battery energy storage project in Victoria?

The first battery energy storage project has been approved under the Victorian government's streamlined renewable energy planning process, with the state signing off on a 350 MW / 700 MWh project being developed by ACEnergy in the Wimmera region.

What is Victoria's largest battery energy storage system?

The \$350 million (USD 224.4 million) project, being developed near the town of Little River about 45 kilometres southwest of Melbourne, will be one of the state's largest battery energy storage systems if it goes ahead and will "support Victoria's clean energy transition."

Will Victorian Government approve a battery energy storage system?

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as it seeks to accelerate the development of projects to support its renewable energy ambitions.

Can Victorian energy storage be connected by 2035?

Victorian Planning Minister Sonya Kirkenny said the new approvals pathway is playing a key role in achieving the state's energy storage targets of connecting at least 2.6 GW of energy storage capacity by 2030 and at least 6.3 GW by 2035.
