## Overview

---

When will 119 MW solar farm be completed in Victoria?

Construction proper has officially begun on a 119 MW solar farm and 100 MW / 200 MWh battery energy storage facility in Victoria's northwest with the state government saying the publicly owned project is on track for completion in 2027.

Will a new solar energy park be built in Victoria?

"The battery also enables an additional 180 MW of new renewables to be connected to the grid." The Victoria-government owned SEC is working with Sweden-headquartered clean energy developer OX2 to build the energy park in two stages, starting with the 119 MW solar farm that is to comprise more than 212,000 PV solar panels.

How much electricity does a solar PV system generate in Victoria?

In Victoria a typical house consumes an average of around 12 kilowatt hours of electricity per day. Over one year, a 1.5 to 3 kilowatt solar PV system can generate around 45-90% of this, though the amount generated by the system varies throughout the year as the amount of daily sunshine changes.

How does solar Victoria work?

Registration is key for Solar Victoria to correctly register business and contact details, as well as bank account details to issue rebates. The portal also enables Solar Retailers to provide details of customer quotes, which Solar Victoria uses to assess the rebate amount and interest free loan amount that an applicant is eligible to receive.
