**Hightvoltage Battery**

## Overview

---

What are solar powered garden lights?

Solar powered garden lights are the glow-up your outdoor space deserves. They are cordless, stress-free, and powered by the sun. Whether you're dressing up your walkway, highlighting your favorite plants, or just want your patio to feel cozy, solar lights make it happen with style and zero impact on your energy bill.

Are solar garden lights dependable?

Today's solar garden lights deliver weather-proof reliability, even through power outages. They are automatic and turn on at sunset and off at dawn. We field-tested 21 models for 150 hours each in real gardens to ensure their dependability.

How do you install solar powered garden lights?

To install solar powered garden lights, space each light 5 ft apart along drives or 3 ft for paths to avoid shadow gaps. Aim each spotlight at a 30° upward angle for dramatic uplighting on trees or focal ornaments.

How long do solar-powered LED lights last?

Solar-powered LED lights will run 3-6 hours on a short December day, depending on the charging hours. For most homeowners, a mix of high-quality pathway stakes and one or two spotlights covers 90% of landscape lighting needs—without an electrician.
