Wall-mounted lithium iron phosphate energy storage cabinet installation site

Overview

What is lithium iron phosphate (LiFePo) battery?

Lithium Iron Phosphate (LiFePO Battery) can be used in most applications that use Lead Acid, GEL or AGM type batteries. 6000 cycles @80% DoD for effectively lower total of ownership cost Low maintenance batteries with stable chemistry. Battery Management System (BMS) is incorporated against abuse.

How do you store a lithium battery?

Lithium batteries provide more Wh/Kg while also being up to 1/3 the weight of its SLA equivalent. Do NOT short circuit, reverse polarity, crush or disassemble. Do NOT heat or incinerate. Do NOT immerse in any liquid. Store at 30~50% SOC. Recharging every 3 months is recommended.

What temperature should a lithium battery be stored at?

Suitable for use in a wider range of applications where ambient temperature is unusually high: up to +60°C. Lithium batteries provide more Wh/Kg while also being up to 1/3 the weight of its SLA equivalent. Do NOT short circuit, reverse polarity, crush or disassemble. Do NOT heat or incinerate. Do NOT immerse in any liquid. Store at 30~50% SOC.
