What is a solar water pump?

A solar water pump is an application of photovoltaic technology which converts solar energy into electricity to run the pumping system thereby, replacing erratic grid supply and pollution-causing diesel-powered versions. Why ZeroPower : Zero Power is an online platform which features a wide range of exclusive renewable energy products.

Is a solar water pump a good choice?

Despite its small size, the pump can raise enough water to create lovely bird baths and small waterfalls, making it a popular choice for backyard gardens. Plus, the durable solar panel's 15-year warranty ensures that it will last for a long time.
