

EQACC SOLAR

Waterproof mobile energy storage container for Jordan power grid distribution stations

Overview

Advantageous integrated energy storage systems (IESS) can be utilized for power systems' operations generating set units with maximum possible efficiency, optimizing of unit commitment, integra.

Why should energy storage systems be installed in Jordanian power plants?

The lack of large energy storage systems prevents conventional power plants from running on maximum generation capacity, any extra generated power to the Jordanian electric loads will flow to Egypt via the tie line; installing large energy storage systems will enhance the electrical generation efficiency .

How does the Jordanian grid work?

The Jordanian grid is connected via tie line with Egypt; due to Egypt's high contribution of the generated energy and connected loads, it controls the frequency over the grid, while the Jordanian national grid controls the power flow over the tie line.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO4) combined with an intelligent 3-level battery management system (BMS);.

Why does the Jordanian national grid need an economic development?

The Jordanian national grid needs an economic development by managing the energy generation in order to decrease the generated energy price . The intermittent nature of output energy from the Renewable Energy Generators (REGs) varies instantaneously with any small variation in weather conditions .

Waterproof mobile energy storage container for Jordan power grid

- 100KWH/215KWH
- LIQUID/AIR COOLING
- IP54/IP55
- BATTERY 6000 CYCLES

Integrated energy storage systems with the Jordanian electrical power grid

Advantageous integrated energy storage systems (IESS) can be utilized for power systems' operations generating set units with maximum possible efficiency, optimizing of unit ...
