

## EQACC SOLAR

# Western Europe Energy Storage solar

## Overview

---

How many energy storage installations are there in Europe?

The total number is slightly higher than the 2024 figures released a couple of months ago by the European Association for Storage of Energy (EASE), which, in partnership with the consultancy LCP Delta tallied 21.1GWh of installations last year in its ninth annual European Market Monitor on Energy Storage (EMMES) report.

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

Will Solarpower Europe deploy 780gwh of battery storage?

Despite this surge, SolarPower Europe said the continent is not on track to deploy the 780GWh of battery storage it claimed will be needed to ensure flexibility, reliability and decarbonisation of the energy sector in line with policy targets by 2030.

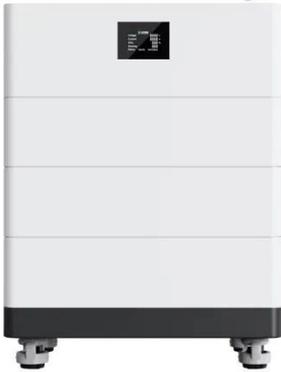

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.
