

EQACC SOLAR

What base stations does Sudan Electricity have

Home Energy Storage (Stackble system)

High Efficiency

Easy installation

Safe and Reliable

Perfect Compatibility

Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with inverter to avoid the compatibility problem

- LFP battery, safest and long cycle life
- Stackable design, effortlessly installation
- Capable of High-Powered
- Emergency-Backup and Off-Grid Function

Overview

How much electricity does Sudan use?

It is estimated that the total installed generation power capacity in Sudan in 2013 amounted to 2,533 MW, with about 70% of the electricity being consumed in the Khartoum area. Domestic power consumption dominates the market, with approximately 65% of electricity consumption being attributable to the sector.

What is the main source of electricity in Sudan?

Hydroelectricity is Sudan's largest source of on-grid power, accounting for 68% of generation in 2011, followed by diesel and heavy fuel oil (27%) and biomass and waste (5%). Hydroelectricity is generated from five dams at Roseires, Sinnar, Jebel Aulia, Khashm el-Girba, and Merowe.

Which energy options will be available in Sudan?

In Sudan, 2. Solar PV energy: 1000 MW (on- and off-grid) and 1000 MW (grid connected) of wind energy will be applicable. Solar CSP technology with a capacity of 100 MW (grid connected) will also be available, particularly in the northern part of Sudan.

What happened in Sudan in 2013?

Riots in Sudan – Sept 2013 In 2013, and again in September 2014, the Sudanese took to the streets in Khartoum violently protesting against the state of the nation's mains supply. Sudan is one of the largest countries in Africa. In July 2011 South Sudan was separated and became an independent country.
