# What communication green base station does Harare use

## Overview

---

Are green cellular base stations sustainable?

This study presents an overview of sustainable and green cellular base stations (BSs), which account for most of the energy consumed in cellular networks. We review the architecture of the BS and the power consumption model, and then summarize the trends in green cellular network research over the past decade.

What is a green communication initiative?

The green communication initiative primarily aims to improve the energy efficiency, reduce the OPEX, and eliminate the GHG emissions of BSs to guarantee their future evolution [ 2, 3 ]. Cellular network operators attempt to shift toward green practices using two main approaches.

Does Bangladesh have a PV/wt hybrid power system?

The PV/WT hybrid power system also warrants further investigation because the annual average wind speed along the coastal area of Bangladesh exceeds 5 m/s at a height of 30 m [ 115 ]. Both UMTS and LTE BSs must also be considered. 4.3.6. Pakistan
