What is Huawei s pack battery

2MW / 5MWh
Customizable

Overview

Does Huawei make batteries?

Even though Huawei doesn't manufacture batteries, the company is putting plenty of R&D resources into developing a new solid-state battery tech. The newest patent reveals a battery pack that can go for 1,860 miles away from the plug and fully charge in just five minutes. This is perhaps one of the craziest technologies we've heard so far.

Is Huawei developing a solid-state battery?

According to the patent, Huawei is developing a solid-state battery architecture with an energy density between 400 and 500 Wh/kg—reportedly three times higher than that of conventional lithium-ion cells used in today's electric vehicles.

What is Huawei's big battery breakthrough?

Huawei's huge battery breakthrough! New solid state tech promises massive range and miniscule charging times Smartphone giant and EV investor Huawei has challenged CATL and BYD's supremacy by inventing a pioneering new battery that blends an incredible range of up to 3000km with a charging time of just five minutes.

How much power does a Huawei EV battery have?

Assuming a similar efficiency, Huawei's battery should have more than three times the capacity of Lucid Air's pack to achieve the range claim for an EV. That is, about 350 kWh, which at 500 Wh/kg (let's pretend this energy density is achievable at pack level), should weigh more than 1,500 lb (700 kg).
