

**EQACC SOLAR**

# **What is Ottawa's first energy storage station**

## Overview

---

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System (“BESS”) is the fastest emerging technology in North America and is planned to be deployed in the City of Ottawa with the Ottawa BESS 2 Project. Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

When did energy storage start in Canada?

The first energy storage project in Canada, the Sir Adam Beck Pump Generating Station, came online in 1957. However, the next project did not come online until 2013. There are three main types of energy storage currently commercially available in Canada:.

What is a lithium-ion battery energy storage system?

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System (“BESS”) is the fastest emerging technology in North America and is planned to be deployed in the City of Ottawa with the Ottawa BESS 2 Project.

What is Hydro Ottawa's largest power station?

As Hydro Ottawa's largest station, Cambrian can power 32,000 homes annually. But what makes it really stand apart is its 15-acre pollinator meadow; one of the largest in eastern Ontario. Piperville (2026) The proposed Piperville Municipal Transformer Station will be the first-ever low-carbon substation for Hydro Ottawa.
