

# What kind of battery does the Jakarta energy storage power station use

## Overview

---

Why do Indonesian batteries need a battery energy storage system?

Batteries are required to provide constant electricity supply to renewable energy plants, which are primarily intermittent, such as solar and wind power plants. The agreement was made with other state-owned bodies, such as the Indonesian Battery Corporation, to build the Battery Energy Storage System by 2022.

Can energy storage systems be deployed in Indonesia?

Tapping into the limited but existing opportunities for deploying energy storage systems (ESS) is vital for expanding their role in Indonesia's power sector. At present, the greatest potential for ESS deployment lies in smaller and/or isolated systems, as well as in industrial or large scale commercial solar rooftop PV with BESS.

Who is involved in the battery energy storage system project?

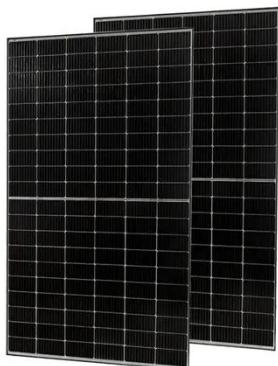

Subsidiaries of PLN involved in the Battery Energy Storage System project happen to be the primary electricity providers in Indonesia, such as PT Indonesia Power, PT Pembangkitan Jawa Bali, and others. The plan to develop an energy storage system aligns with the positive growth in the renewable energy industry.

What is a battery energy storage system?

The new energy storage system is a device that enables energy from renewables to be stored and then released based on the needs of the customer. The Battery Energy Storage System is a pilot project and is a concrete example of the government's attempt to shift away from diesel-generated power and transition to cleaner energy.

## What kind of battery does the Jakarta energy storage power station

---

### Jakarta energy storage battery system

Jakarta energy storage battery system Tehachapi Energy Storage Project, Tehachapi, California. A battery energy storage system (BESS) or battery storage power station is a type of energy

...
