What to prepare for when a solar container communication station loses power

Overview

How do you prepare for a geomagnetic storm?

To begin preparing for the potential loss of electrical power in an extreme geomagnetic storm case, you should ; build an emergency kit and make a ; family communications plan. Other steps you should take to prepare for an emergency: Fill plastic containers with water and place them in the refrigerator and freezer if there's room.

How do you prepare for a power outage?

Other steps you should take to prepare for an emergency: Fill plastic containers with water and place them in the refrigerator and freezer if there's room. Leave about an inch of space inside each one because water expands as it freezes. This chilled or frozen water will help keep food cold during a temporary power outage.

How do you keep food cold during a power outage?

Leave about an inch of space inside each one because water expands as it freezes. This chilled or frozen water will help keep food cold during a temporary power outage. Most medication that requires refrigeration can be kept in a closed refrigerator for several hours without a problem. If unsure, check with your physician or pharmacist.

What should I do if I lose power?

If you have a traditional landline (non-broadband or VOIP) phone, keep at least one non-cordless receiver in your home because it will work even if you lose power. Prepare a family contact sheet. This should include at least one out-of-town contact that may be better able to reach family members in an emergency.
