# Where are there hybrid energy 5G base stations in Japan

智慧能源储能系统  
Intelligent energy storage system

## Overview

---

How much will Japan invest in 5G?

The four major 5G network carriers in Japan are anticipated to invest a significant sum, to the tune of \$14 billion, to expand the 5G network in the country. This covers base stations, servers, and fiber optic investments.

Why is 5G so popular in Japan?

For the same reason, Japan has allowed operators to mount 5G base stations atop traffic signals since 2022, which has accelerated 5G deployments throughout the nation, as reported by GMSA. Higher-capacity use cases will be able to thrive as tiny cells are deployed and network density is enhanced.

Does KDDI have a 5G base station?

The company will support KDDI in deploying “manhole-shaped” 5G base stations, supplying sub-terrain antennas. Vault base stations enable service providers and cities to place equipment in existing underground vaults, with fiber and power infrastructure connected to antennas on the ground level.

Does Ericsson have a 5G base station?

. Ericsson (NASDAQ: ERIC) was selected by the Japanese communications service provider KDDI as a partner for Japan’s first vault 5G base stations. The company will support KDDI in deploying “manhole-shaped” 5G base stations, supplying sub-terrain antennas.
