# Which Bamako Communication has more 5G base stations

## Overview

---

How big is the 5G base station market?

Macro cells represented USD 22.9 billion and 61.3% of the 2024 5G base station market share, providing umbrella coverage and mobility anchor services. Yet small cells are forecast to expand at a 29.4% CAGR, pushing their slice of the 5G base station market size toward USD 50 billion by 2030.

How many base stations will 5G have in 2025?

The U.S. has ambitious plans for 5G expansion, aiming to have more than 300,000 active base stations by 2025. This goal is being driven by investment from private telecom providers and government initiatives like the Rural 5G Fund. For businesses in the U.S., this means increasing access to high-speed connectivity.

How many 5G base stations are there in Japan?

Japan had over 100,000 active 5G base stations by 2023 Japan's 5G network is expanding rapidly, with over 100,000 active base stations by 2023. The country has taken a strategic approach, focusing on major urban centers first and gradually expanding to rural areas.

Who makes 5G base station equipment?

19. The top 5 telecom equipment providers for 5G base stations are Huawei, Ericsson, Nokia, ZTE, and Samsung When it comes to 5G base station equipment, five companies dominate the market: Huawei, Ericsson, Nokia, ZTE, and Samsung. These firms provide the hardware and software needed to power the world's 5G networks.
