What is an uninterruptible power supply (UPS)?

A solid Uninterruptible Power Supply (UPS) can be a real lifesaver, keeping everything running smoothly when the lights go out. We've done some digging into the top picks, backed by data and expert review.

What is a ups & how does it work?

What is a UPS?

UPS stands for uninterruptible power supply, it's a device that acts as a battery backup in case of an electrical power failure. Small UPS machines for homes and offices supply enough power for a few minutes, so there's time to turn off devices properly without losing any work.

Should I buy the best ups?

These days many of us are working from home, so buying the best UPS your budget can stretch to is even more important. You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges.

Which ups is best for a home office setup?

For a dependable UPS that perfectly suits a home office setup, the APC Back-UPS 425VA stands out as the top choice. This model offers reliable power backup for essential devices such as computers, routers, and modems. Its compact design makes it a great fit for small spaces, ensuring you can continue working even during power interruptions.
