

# Which mobile power storage vehicle is better in Canberra

## Overview

---

### What is the Big Canberra battery?

The Big Canberra Battery will play a crucial role in managing peak electricity use demand and in supporting the ACT's transition to a more sustainable energy future. For technical specifications of our work on the Big Canberra Battery, or to discuss engaging us on similarly ambitious battery storage projects, please contact our team.

### Will big battery power a third of Canberra households in 2025?

Canberra Times: ground breaking ceremony, plugging in profits from a big battery. ITP Renewables was engaged by EKU Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin powering one-third of Canberra households from 2025.

### Can solar energy be stored in Australia?

In the world of energy storage, there seems to be new technology and products hitting the Australian market, designed to enable home and business owners to store their excess solar energy and power their home independent of the grid.

### Can a vehicle-to-home EV & charger be a mobile form of energy storage?

A vehicle-to-home-enabled EV and charger setup could assist this kind of system to be a mobile form of energy storage. For an example, if there was an extended blackout, you could drive to the nearest suburb with public charging, drive home and continue to power your house and repeat until grid power is restored.
