# **Which solar base station is the best in Hanoi**

## Overview

---

Does Hanoi city have solar energy potential?

The solar energy potential in Hanoi city was analyzed. A methodology for assessment of rooftop solar power technical potential has been presented. The total installed capacity and the total generated electricity of rooftop grid-tied solar power system in Hanoi city are calculated.

What is the technical potential of rooftop solar power in Hanoi city?

In this paper, the technical potential of rooftop solar power in Hanoi city is evaluated by using high-resolution remote sensing images technology, it can be seen that the total annual installed capacity of rooftop PV power and the PV optimal in Hanoi city are about 13,169.72 MWp and 37,591,481.20 MWh/year, respectively.

How to choose a suitable area for solar panels in Vietnam?

The suitable area for installing PV systems is determined for each rooftop in the city while solar radiation data ( (1) horizontal, (2) inclined (according to the slope and roof direction) and (3) the optimal (when slope = latitude and direction = south)) are taken from Vietnam solar energy map [ 33 ].

Does Vietnam have a solar energy strategy?

Vietnam is making significant strides in its renewable energy sector, focusing on solar power as a key component of its energy strategy. By 2030, the country aims to generate 16% of its energy from solar, driven by substantial investments in solar farms across the nation.
