

EQACC SOLAR

Wholesale bess storage system in Finland

Overview

Is paistinkulma energy storage the largest battery energy storage system in Finland?

Paistinkulma Energy Storage is set to become one of the largest battery energy storage systems (BESS) operating in Finland's frequency reserve market. Taaleri Energia, a Finnish-based wind and solar energy developer and fund manager, has launched its first BESS investment in Lempäälä, Finland.

How does Bess work in Finland?

BESS operators can also participate in cross-border markets to provide storage capacity for ancillary services, such as frequency regulation, which helps maintain grid stability and reliability. Ancillary services are currently the primary revenue source for BESS in Finland.

What is a battery energy storage system (BESS)?

Business model and regulatory considerations are concluded. Battery Energy Storage Systems (BESS) can provide services to the final customer using electricity, to a microgrid, and/or to external actors such as the Distribution System Operator (DSO) and Transmission System Operator (TSO).

Is Finland a good market for storage as a service business?

The Finnish market has some specific characteristics that make it an interesting target as a case study regarding storage as a service business. Finland is the first country in the world to have adopted smart electricity metering (hourly metering and remote reading) on a full scale.
