# **Why do we need to charge solar energy on site**

## Overview

---

Should I charge my solar panels with grid power?

So, when your electricity is at its cheapest and your battery storage for solar panels needs a little help, simply charge the battery with grid power. The energy you store will help to power your home at times of the day when electricity costs are at their highest.

Can a solar power battery charge from the mains?

Even if you have solar power battery storage, maximising it to ensure you're fully self-reliant is, at times, impossible. When you have a solar energy battery you can charge directly from the mains with grid electricity, however, you can top up when your electricity tariff is at its cheapest. And that's usually during the night with an EV tariff.

Why should you use a battery for solar power storage?

Your battery for solar power storage will help you use solar power in your home throughout the night. Not only that, but if you have a battery that can be plugged into the grid, you'll be able to store energy when it's cheap and use it when tariff costs are high.

Why is solar energy important?

To understand why is solar energy important, we must look at its environmental impact. Solar power is clean, renewable, and does not emit greenhouse gases. Unlike fossil fuels such as oil, gas, and coal, which release carbon dioxide into the atmosphere when burned, solar panels have no emissions when generating electricity.

## Why is solar energy important?

Solar Energy Is Renewable  
 Solar Energy Cuts Down on Expensive Utility Bills  
 Solar Energy Systems Are Extremely Low Maintenance  
 Solar Panels Are Versatile  
 Solar Energy Doesn'T Cause Pollution Or Greenhouse Gas Emissions  
 How Is Solar Energy harnessed?  
 Transition to Solar Energy Today!  
 To understand why solar energy is important, one must understand its versatility. Solar energy can easily be used to power your home. The installation costs vary, but the size of the system you need depends on how much solar energy you want to generate. For example: 1. A rooftop installation requires no ground-based equipment or maintenance, and it See more on [blog.sebatteryspotlight](https://blog.sebatteryspotlight.com)
